

# Ishma Khan

## FRONT-END DEVELOPER

[GITHUB](#) | [EMAIL](#) | [PORTFOLIO](#) | [LINKEDIN](#) | **M : 8955223891**

---

Detailed-oriented Software Developer with a strong focus on front-end. Dedicated to delivering innovative solutions and contributing to impactful projects.

## SKILLS

ReactJS | Redux Toolkit | JavaScript | TypeScript | Tailwind CSS | CSS3 | HTML5 | Git | Github

## PROJECTS

**ParkEase:** [Link](#) [Github](#)

Technologies: **React.js**, Redux Toolkit, CreateAsync Thunk, Google Map API, Mock API, Router 6, Loader, **Outlet**,

**Tailwind CSS**, **useSearch Params**, Custom Hooks, Skeleton, Miragejs, **React Toastify**

ParkEase simplifies the process of **booking parking slot** in busy cities, allowing individuals to reserve their spot easily.

- Two types of booking pages ListBooking and MapBooking with **Filters** of Price, Distance, Complex.
- **Redux Toolkit** for state management, **createAsyncThunk** to fetch parking data from a **custom mock API**.
- **Custom hook**, **useCheckAvailability**, for booking parking slots based on date, time, duration, and basement.
- **React Router** for navigation, **lazy loading**, **suspense**, **loaders and skeletons** for an optimized user experience.
- User authentication and authorization with **JWT**, using **MirageJS** for a mock backend.
- **Google Maps API** and **Places Autocomplete** for enhanced location input and real-time tracking.

**Streamify:** [Link](#) [Github](#)

Technologies: **React.js**, Redux Toolkit, Recharts, **CreateAsync Thunk**, **Mock API**, **Router 6**, **Tailwind CSS**

A responsive **analytics dashboard** for "Streamify," a fictional music streaming service, showcasing key metrics and data visualizations for user activity, revenue, and content performance.

- **Single-page application** (SPA) featuring key metrics cards, data visualizations using **Recharts** and a detailed streaming **data table** with **sorting** and **filtering** and pagination capabilities.
- **Redux Toolkit** for state management, **createAsyncThunk** to fetch streamify data from a **custom mock API**.
- Responsive UI with a modern aesthetic, incorporating a **dark/light theme toggle**.

**Cartify:** [Link](#) [Github](#)

Technologies: **React.js**, Redux Toolkit, **Router 6**, **Tailwind CSS**, **Skeleton**, Custom Hooks, **React Toastify**

An **e-commerce platform** incorporating key features such as product listings, advanced filters, pagination using **Custom Hooks** and shopping cart functionality.

- Implemented state management with Redux Toolkit.
- Designed a **responsive** UI with **dark/light mode theme** toggle, along with reusable components, loaders and skeletons for improved user experience.

## CERTIFICATES

- Modern JavaScript from the beginning 2.0 2024 , [\(Udemy\)](#)
- The Ultimate React Course 2024 , [\(Udemy\)](#)

## EDUCATION

- Master's Degree , University Of Rajasthan
